NeBULAX®

Creating Value through Packaging Integration

Pallet Shrinkhood

NeBULAX® Pallet Shrinkhood

Our NeBULAX is multi-layer co-extrusion film. It is intended to be used in logistic and warehousing applications.

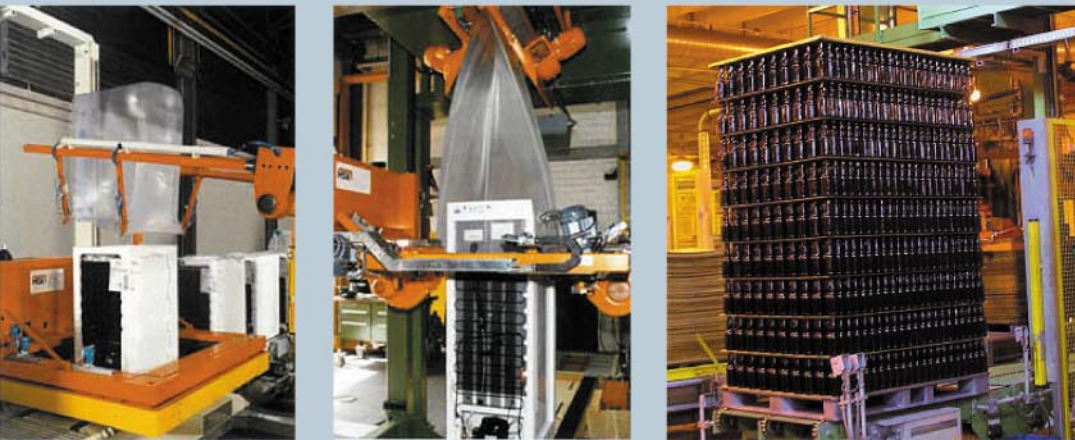

We offer reliable and safe plastics to bundle and stabilize products mounted on pallets, especially of products with high broken fragility, such as glasses, bricks, ceramics, etc.

Other benefits that we deliver are protections against dirty, scratch, collapses and destructive UV lights.

Gusseted shrinkhood is also available for our bussiness partners requiring large size shrinkhood tubular film.

NeBULAX pallet shrinkhood is positioned to bring solutions as well as value creations to our bussiness partners.

NeBULAX Pallet Shrinkhood Machine Process

* Colors, UV-absorbers and special grades are obtainable upon request

Bellow are some advantages of NeBULAX Pallet Shrinkhood :

- High shrinkage ratio
- High heat resistance
- Strong puncture resistance
- Strong dart impact resistance
- UV protection
- High protection of dust, moisture, or scratch
- High efficiency of time and cost in packaging
- High stability of product loading and transportation

NeBULAX Pallet Shrinkhood are available in tube pieces as well as rolls.

NeBULAX Pallet Shrinkhood End-Use applications :
